Cloud AI Developer Services

The most comprehensive AutoML across structured, time-series, image, video, audio and text data

Starts at mm:ss

Table of contents

Tabular Services

00:46

- Connectors & Data Preparation
- Feature Store
- **DriverlessAI**
  - Data Visualization
  - Feature Engineering
  - Model building
  - Machine Learning Interpretability
- **H2O MLOps**
  - Model Management
  - Model Deployment

Language Services

12:38

- OSS Chatbot and RAG (h2oGPT)
- Enterprise Chatbot with RAG capabilities
- **Large Language Model (LLM)**
  - Data preparation
  - No-code LLM Fine-tuning tool *(Causal & RLHF language modelling, Seq2Seq, Causal classification)*
  - LLM Deployment
  - LLM and RAG Evaluation
- **No-code NLP tool**

Vision Services

26:51

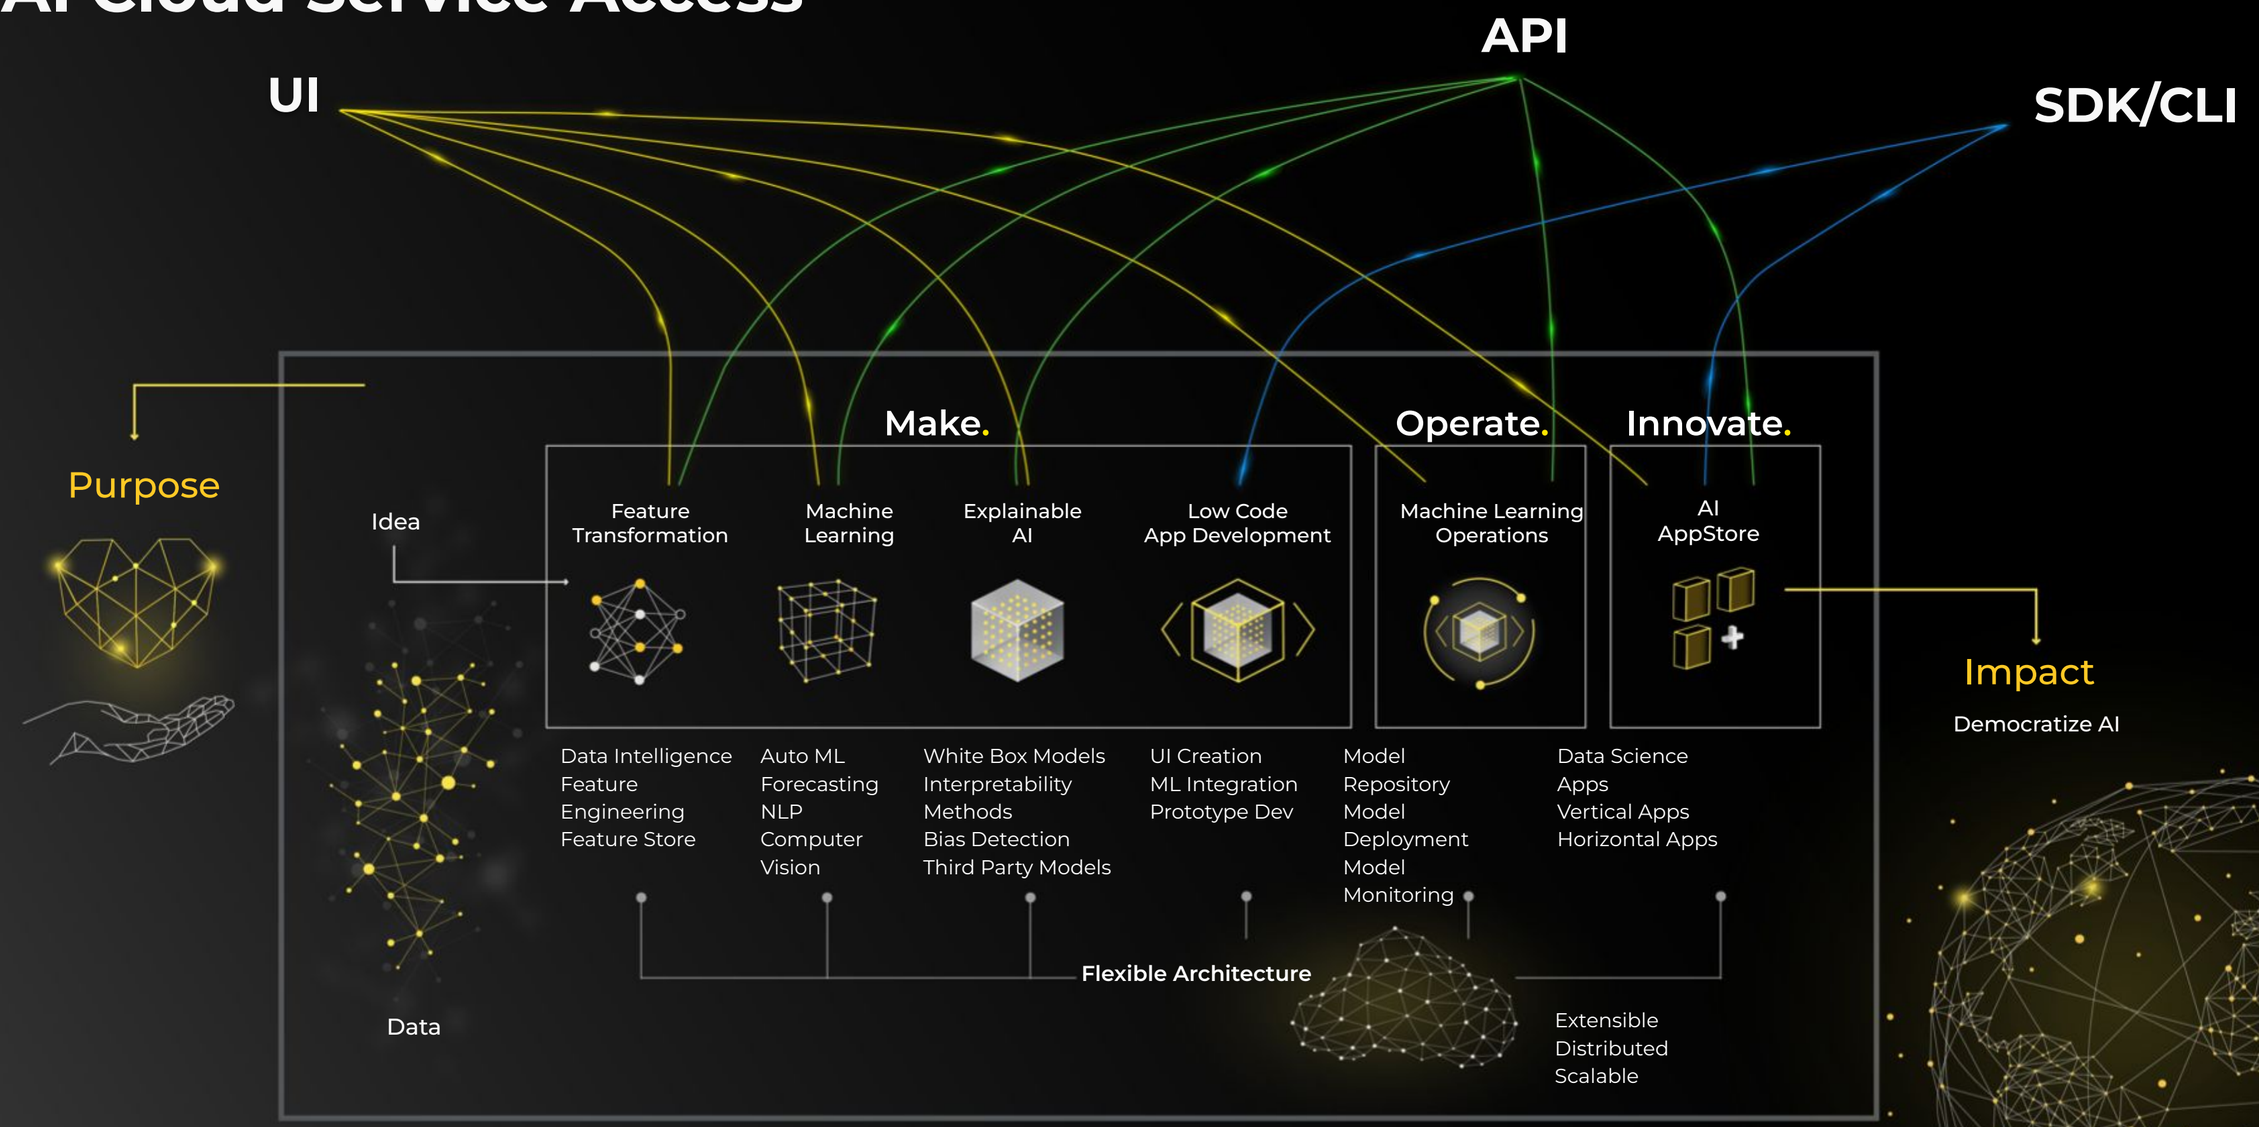
- Accelerating labelling efforts
- **No-code Computer vision tool** *(Classification & Regression, object Detection, Semantic and instance segmentation, metric learning)*
  - DL Model deployment
- Optical Character Recognition
- Gen AI app Studio (NLP and Image)
- OSS Chatbot with Image and Video Generation

AI Code Assistants

35:30

- **AI Assistant Integration into H2O Notebook Lab**
- AI Agent: H2O Function
- AI “Niche” Assistant with Enterprise h2oGPT RAG

AI Cloud Service Access



H2O.ai Confidential

H2O AI Cloud

Democratize and Accelerate AI Results with Trust and Confidence

MAKE WITH H2O.ai

H2O.ai

Flexible Architecture
Deploy Multi-Cloud, Deploy in your VPC, on prem, air gapped OR Hosted and managed for you, by H2O

Make.

Make Models and Applications with Accuracy, Speed and Transparency

H2O-3
Open Source Distributed Machine Learning

H2O Driverless AI
Award-Winning AutoML

H2O Hydrogen Torch
No-Code Deep Learning

H2O Document AI
Intelligent Document Models

LLM Studio
Open Source LLM Fine-Tuning

Operate.

Streamline Performance Monitoring and Rapidly Adapt to Changing Conditions

H2O AI Feature Store
High-Scale and Intelligent Feature Store

H2O Label Genie
AI labeling because no one wants to label data

H2O DataStudio
Prepare your data

H2O EvalStudio
Evaluate your LLM for each task, each requirement

H2O MLOps
Model Hosting, Monitoring and Deployment

Innovate.

Easily Deliver Innovative Solutions to End Users with an Intuitive AI App Store

H2O AI App Store
Find, Share, and Discover AI Apps

Industry Apps
Pre-built AI Apps

H2O Wave
Low-Code AI AppDev Framework

Enterprise h2oGPT
Talk to your documents, ChatBots and more with H2O LLMs

H2O.ai Confidential

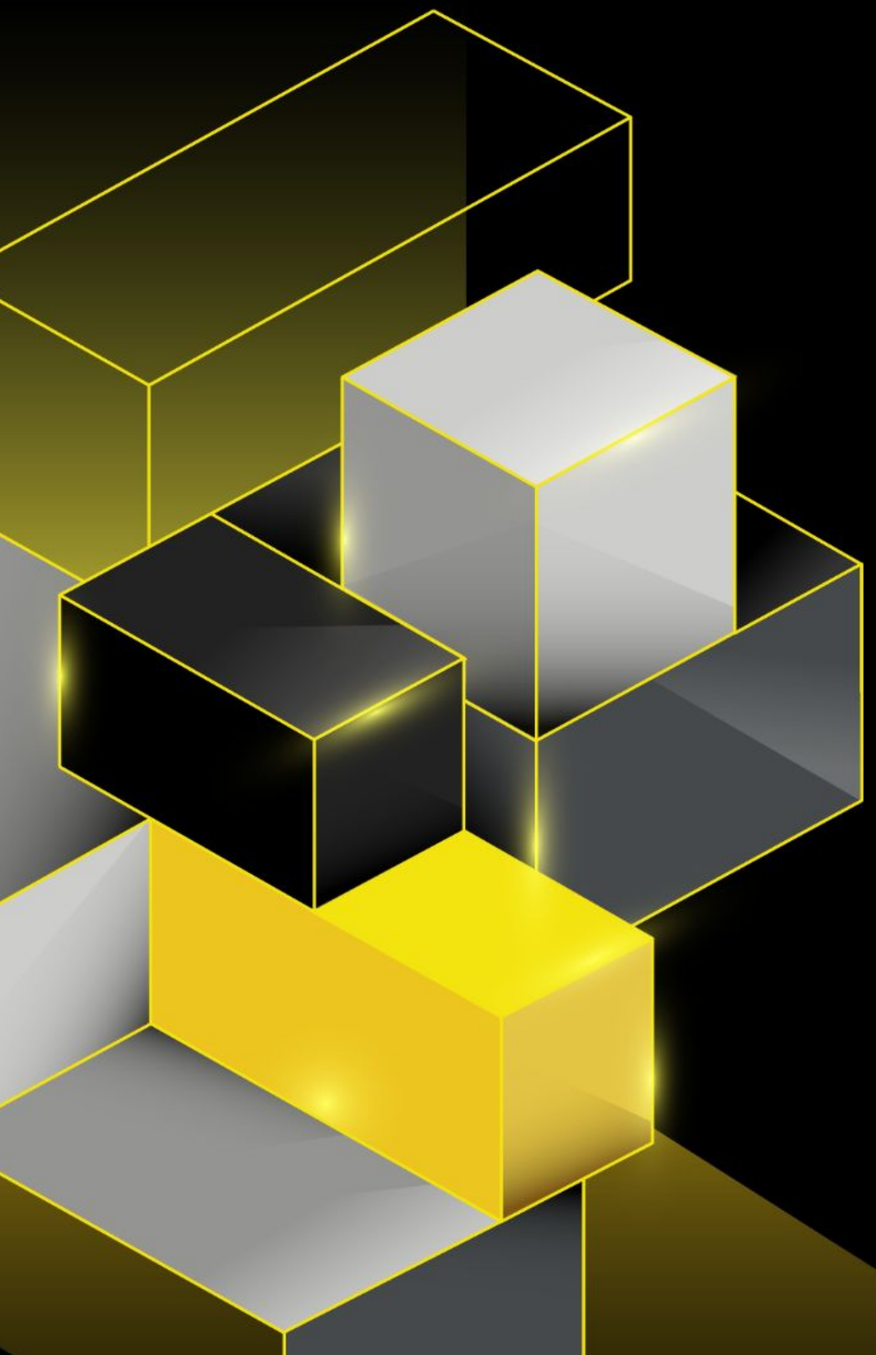
Tabular Services



H2O DRIVERLESSAI

Award-Winning AutoML

H2O.ai Confidential

How Driverless AI Works

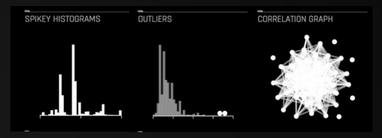
1 Drag and Drop Data

Bring data in from cloud, big data and desktop systems

- HDFS
- SQL
- Local
- Amazon S3
- Snowflake
- Google BigQuery
- Azure Blog Storage

2 Automatic Visualization

Understand the data shape, outliers, missing values, etc.



3 Automatic Model Optimization

Use best practice model recipes and the power of high performance computing to iterate across **thousands of possible models** including advanced feature engineering and parameter tuning

4 Bring Your Own Recipes

Transformations
...

Algorithms
...

Scorers
...

5 Automatic Scoring Pipelines

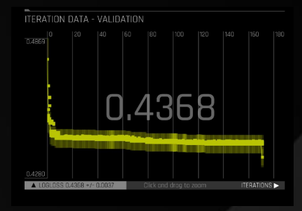
Deploy ultra-low latency Python or Java Automatic Scoring Pipelines that include feature transformations and models

Automatic Model Optimization

Model Recipes

- i.i.d. data
- Time-series
- NLP
- Image
- ...

Survival of the Fittest



Advanced Feature Engineering + **Algorithm** + **Model Tuning**
